Bachelor of Science, Informatics

Indiana University
May 2015
Minors:
Computer Science,
Security,
Human-Centered Computing

EXPERIENCE

Jr. Software Engineer

Email on Acid
September 2017 – Present

Maintains old products using Node while building, architecting and implementing new products using Angular and Node. Queries on current databases to confirm data accuracy as well as adding in tables for new products using MySQL. Fixes bugs and maintains both the company website and product functionality using PHP. Uses Redis on a day to day basis to confirm record creation for screenshot process. Completes quality assurance testing on code for the development team. Assists in move from an old process using SMTP to a new process using IMAP while refactoring code to be more efficient.

Software Consultant – Developer

Blue Horseshoe Solutions
June 2015 – June 2017

Managed warehouse management and transportation management system implementations. Assisted clients in bridging the gap between their distribution operation and technology by tailoring the solution to meet their specific requirements. Used X++ and SQL to fulfill functional and technical roles on Microsoft Dynamics AX projects. Wrote technical designs. Acted as a technical lead on some projects.

Information and Computing Instructor

School of Informatics and Computing at Indiana University
January 2012 – May 2015

Attended lectures, lab sections and study sessions for INFO-I 101: Introduction to Informatics, a class taught in the School of Informatics and Computing. Taught material covering HTML, CSS, JavaScript and other new technologies to a lab section of 25-30 students each semester. Responsible for various grading duties. Previously held the position of Undergraduate Mentor.
